

REACH Audits – keeping in touch with your suppliers

Supplier Audit Form

Your own REACH compliance can be seriously affected by your suppliers and, with a complex network of businesses selling to your organisation, keeping in touch with their chemicals management processes can be a daunting prospect.

The REACH Centre team is available to conduct audits of your suppliers, not only ensuring their compliance with EU REACH legislation, but also giving you a clear indication of the strengths and any weaknesses in their chemicals management systems.

Our basic service consists of the collection, analysis and scoring of a written questionnaire from each supplier, resulting in a snapshot of the following factors:

- Management systems
- REACH compliance
- Supply chain communication
- Auditing
- Continuous improvement.

The basic rate for each audit is £125 (English language, single contact) and, for an additional fee, we can follow up on the supplier's responses, checking on their systems and advising on any priorities for improvement.

You choose the level and scope of your audit project:

- audit a cross-section or sample of your suppliers
- focus on a couple of key players where you have concerns or
- create a comprehensive database of supplier audits.

We understand that your own REACH compliance can be seriously affected by your suppliers.

Our flexible and focused REACH Audit service gives you the confidence to manage the chemicals of concern in your supply chain.

Contact us today: email enquiries@thereachcentre.com to discuss your needs and to find out more about our REACH Audit approach or call us on +44 (0)1524 510278 for details.
